FUNFORLAB INTERREG-EMR:

D.T4.3.1 Video Tutorial

Produced by the FUNFORLAB consortium:

THE FUNFORLAB project is co-financed by:

Description of the deliverable

A video tutorial was made In English to promote the use of the VR game for MLT training, and translated in French, German and Dutch.

The first video is the VR game trailer, which contains the game's storyline, and a short demonstration of the VR game itself. The other videos can be used by those who intend to use the VR game, and have trouble getting started. Together, they make up the installation guide of the VR game.

> Video 1/3 of the installation guide shows how to unbox a Meta Quest 2 VR headset, and which other items are included in the packaging. Video 2/3 explains which steps are needed to register to and login to your own Meta Developer Account which is needed to install the VR application onto the headset. Video 3/3 shows how to install the FunForLab VR game onto the VR headset and how to launch it to start playing.

All videos are available online via the official project website (together with the link to download the .apk file of the game) and via the FunForLab YouTube channel (with different playlists for the different languages).

A print screen of the official project website in English, where one can access the videos, is shown on the next page.

Availability

The videos are available via:

 https://www.youtube.com/@funforlab341/featured (FunForLab channel)

 https://funforlab.eu/ (official project website > Play our Games > Virtual Reality)
